

## Description

Mi-Wave's 690 series flanged waveguide sections are precisely fabricated using MIL-SPEC waveguide and flanges. These are used in operational millimeter wave transmission systems and as basic transmission sections in test and laboratory sets.

## Notes

S/N: NA

## Electrical Specifications

	Minimal	Typical	Maximum
Frequency	60 GHz		90 GHz
VSWR		1.06:1	

## Physical Specifications

Input and Output Ports	WR-12 Waveguide, UG-387/U Flange
Material	Oxygen Free Copper
Finish	Gold Plated
Length	1 Inch

Tested by: LS

Date: 2021-02-05
